

### **Professional Summary:**

I am a self driven full stack developer who builds clean, fast, and secure web solutions from the ground up. I merge design precision with backend logic, delivering systems that not only look best but perform under pressure and also with return of investment in mind. Experienced in web development, web security, UI/UX alignment, and modern deployment practices.

I understand code beyond syntax , I understand systems, performance, and people. My focus is creating value that lasts, prints profit and not quick fixes.

### **Skills:**

- Frontend: React.js, Next.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, TailwindCSS, Bootstrap, flutter
- Backend: Node.js, Express, PHP, Laravel, REST APIs, MySQL, MongoDB, PostgreSQL, python
- **Security:** Vulnerability scanning, malware cleanup, penetration testing, patch management
- Operating Systems: Windows, Linux
- Cloud platforms: Azure AD, Okta, Intune, AWS, Docker, (capable of setting up and managing secure servers and deployment environments)
- Collaboration Tools: Teams, Slack, Zoom, Git, Anydesk
- 

### **Projects**

#### **1. My personal Portfolio**

- My sleek optimized portfolio, static but behaves like it has a backend
- Tech stack: html, css, js (all vanilla no frameworks)
- Live: <https://qahnaxy.github.io/>

#### **2. Statika, bloggin system without backend**

- Made mainly for github systems, uses json as database, requires no backend
- Tech stack: html, css, js (all vanilla no frameworks)
- Live: <https://qahnaxy.github.io/blogs.html>

#### **3. Trader's portfolio**

- A portfolio I made for a trader.
- Techstack: html, css, js, php (all vanilla no frameworks)
- Live: <https://kabbafox.com/>

**Education**

Proudly and unapologetically self taught.

**Personal Trait**

Loyal to the contract.

I don't need supervision

I build like it's mine.

Deeply passionate about technology
